

# AURORA ECOPLAST™

## BUILDING SUSTAINABILITY-FOCUSED SOLUTIONS

### Explore the Potential of Recycled Content Solutions for Polymers

Aurora Material Solutions is dedicated to continuous environmental stewardship through comprehensive sustainability-focused initiatives.

As part of our commitment to sustainability-focused solutions, we've developed our AuroraEcoplast™ product line utilizing PC, rigid PVC, PET and more. These products incorporate post-consumer recycled and post-industrial repurposed content ranging from 10% to 100%, helping our customers to meet their own sustainability goals while maintaining high performance standards.

These integrated recycled and repurposed content efforts collectively help to reduce our environmental carbon footprint while delivering value to customers who prioritize material solutions that support their sustainability goals.

Aurora Material Solutions has earned distinguished recognition for its responsible practices, receiving the prestigious **+Vantage Vinyl Verified Gold Certification**. This honor reflects the company's leadership in environmental stewardship, social responsibility, transparent communication, and innovative approaches to economic resilience.

Aurora Material Solutions is a recognized leader in advanced practices in Environmental Stewardship, Social Diligence, Open Communication, and Innovation Practice in Economic Soundness.
